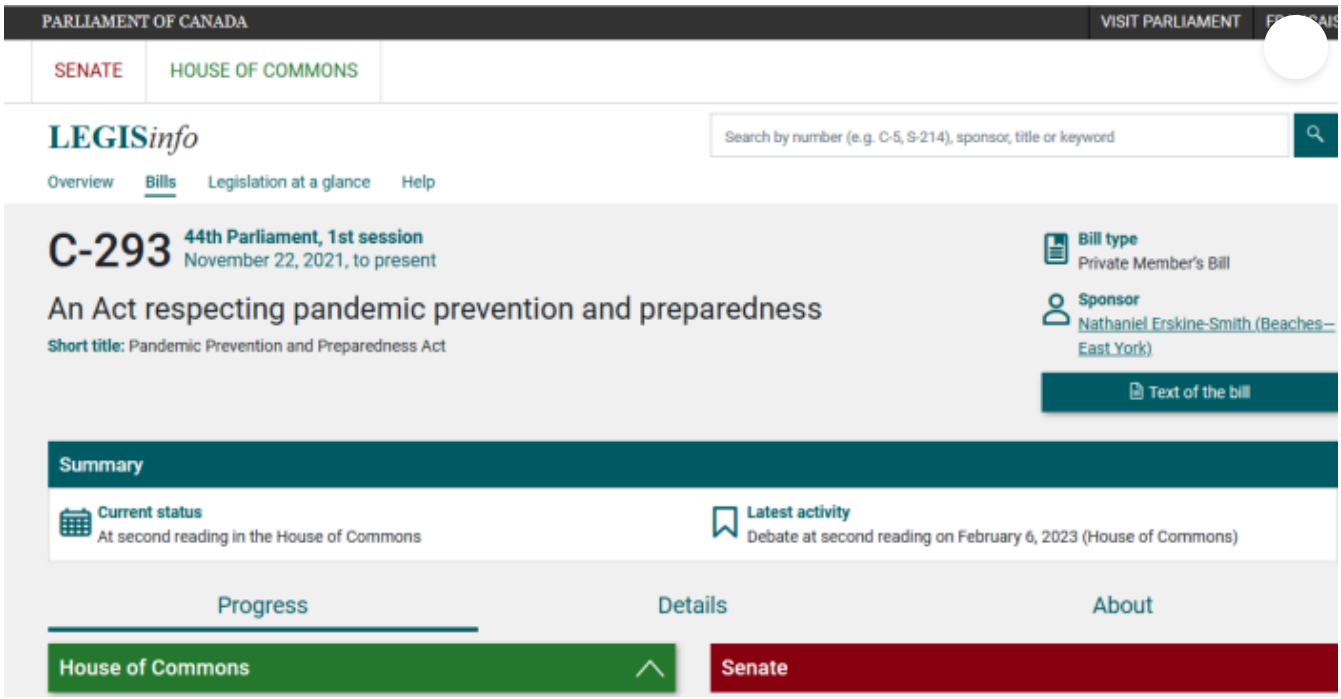
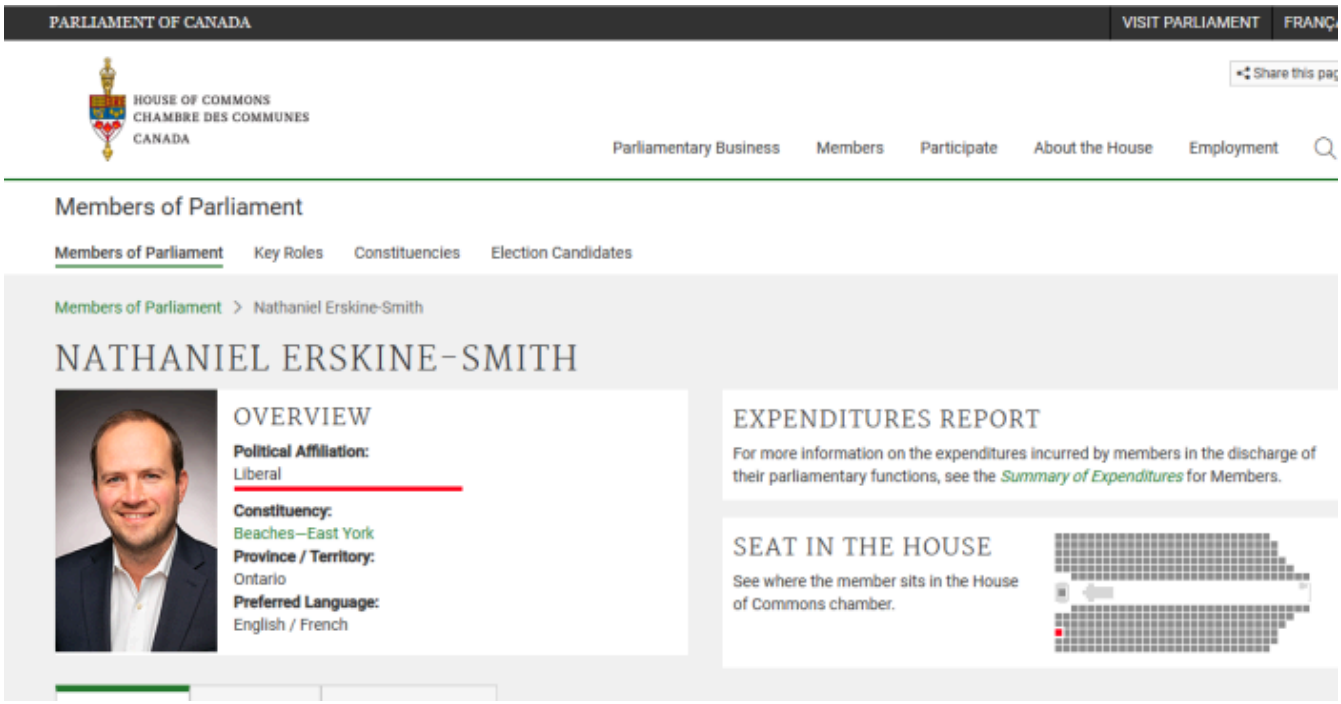
Bill C-293: Who’s Pulling Nathaniel Erskine-Smith’s Strings?





Previously, this site covered Bill C-293, the Pandemic Prevention and Preparedness Act, from Liberal M.P. Nathaniel Erskine-Smith. See here and here for background information on the legislation.

In essence, it amounts to domestic implementation of the proposed Pandemic Preparedness Treaty that the World Health Organization wants all countries to adopt. Just as the Quarantine Act and subsequent Provincial Health Acts came from the International Health Regulations, this is more of the same. See Parts 1, 2, 3, 4, 5, 6, and 7.

January 2022, Erskine-Smith introduced M-43, to address "vaccine equity". If implemented, this would:

> (a) ***donate at least 200 million doses, as promised, to vulnerable populations around the world through COVAX by the end of 2022***, and ensure that all excess doses pursuant to Canada's contracts are transferred as soon as possible;
> (b) ***deliver an additional $1.1 billion as a net addition*** to the International Assistance Envelope and existing departmental resources to address global vaccine equity in Budget 2022, including:
> (i) ***$780 million to Act-Accelerator partners to purchase vaccines***, tests, treatments, PPR and oxygen in developing countries,
> (ii) ***$290 million to strengthen pandemic preparedness and response capacity***, including support for in-country delivery costs;

(c) ***contribute to a significant increase in global manufacturing capabilities for vaccines*** and other tools to fight COVID-19, including by:
(i) ***supporting the temporary waiver of intellectual property rights related to prevention, containment or treatment of COVID-19*** at the World Trade Organization,
(ii) facilitating the transfer of technology to manufacture COVID-19 vaccines around the world, including financial support for regional hubs such as the South Africa Technology Transfer Hub; and

M-43 appears to create a giant slush fund that would pour billions of taxpayer dollars into "vaccine equity" arrangements around the world. It's unclear what — if any — oversight there would be.

As with so many of these bills, some very important questions aren't being asked: who's actually behind it? Who are the people that are *really* writing them?

Here are some possible answers.

Daniel Kelter, Former Legislative Assistant, Now Lobbyist

Notifica
Daniel Kelter (He/Him)
Director of Government Relations @ Carbon Removal Canada
Legislative Assistant & Director of Ottawa Operations to MP Nathaniel Erskine-Smith
Mar 2018 - Sep 2018 · 7 mos
• Advised the Member on all policy issues before the House of Commons, and prepared briefs on issues and legislation when necessary.
• Planned, in conjunction with the Member, legislative priorities and assisted with the development of speeches, press releases, media lines, QP card messages, key messages etc.
• Managed a whole-of-organization approach to completing Member's business, while overseeing an office team consisting of staff, interns, and volunteers
• Managed and reconciled a budget of $368,720 that included procurement, salaries, travel, and constituency or parliamentary events

According to his profile, from December 2015 until September 2018 — nearly 3 years — he worked for Erskine-Smith.

*• **Briefed the Member of Parliament** on policy issues, including debates in front of the house, proposed legislation, and committee reports/issues*
*• Liaised and maintained relationships with Minister's offices, constituency residents, parliamentary staff, **and relevant special interest groups***
*• **Designed and created communication products across social media and traditional media platforms**, and created subsequent analytical reports on their impact*
• Managed an office budget of $359,590 and provided accurate financial accounting to comply with House of Commons by-laws

If Kelter is to be believed, he essentially wrote Erskine-Smith's speeches and various media appearances. He was a handler. The last several months, Kelter not only worked for him, but was the Director of Operations. His duties at this point were that he:

*• **Advised the Member on all policy issues** before the House of Commons, and **prepared briefs on issues and legislation when necessary***
*• Planned, in conjunction with the Member, legislative priorities and **assisted with the development of speeches, press releases, media lines, QP card messages, key messages etc***
• Managed a whole-of-organization approach to completing Member's business, while overseeing an office team consisting of staff, interns, and volunteers
• Managed and reconciled a budget of $368,720 that included procurement, salaries, travel, and constituency or parliamentary events

Kelter then went on to take a similar role for Jane Philpott, who was Minister of Health. She also was a Treasury Board Member, and on the Cabinet Committee on Intelligence and Emergency Management.

Daniel Kelter (He/Him)
Director of Government Relations @ Carbon Removal Canada
Director of Government Relations
Carbon Removal Canada · Permanent Full-time
Oct 2023 - Present · 1 yr 2 mos
Ottawa, Ontario, Canada

Kelter's current position is with a group called Carbon Removal Canada. They explain what their goals are, and why.

What does Carbon Removal Canada do?

Carbon Removal Canada collaborates with governments, local communities, Indigenous groups, innovators, advocacy organisations, and companies to grow the carbon removal sector in Canada.

Our goal is to advance responsible carbon removal solutions by educating stakeholders about using them to reduce CO_2 in the atmosphere while focusing on community well-being and social equity. We also assist in developing policies that increase the demand for and supply of carbon removal projects, ensuring that these projects are credible and impactful. Additionally, our policy research supports the growth of carbon removal by providing insights that meet the sector's current needs and help shape effective policies.

Why Canada for carbon removal?

Canada has the right ingredients to be a global leader in the carbon removal sector, including natural resources, carbon storage infrastructure, a trained workforce, and a thriving innovation ecosystem.

Canada's ambitious goal of reaching net-zero emissions by 2050 reflects its climate leadership as a nation — which will require a broad suite of solutions, including carbon removal, for goal achievement. With the right policies in place, the Canadian government, technology and business leaders have all the tools they need to seize this opportunity, spearhead the global growth of a brand-new sector, and build it from the ground up.

Why does Carbon Removal Canada advocate using carbon removal alongside emission reduction efforts?

Carbon removal is essential for a global clean energy transition, but it should complement, not replace, emissions reduction efforts. Carbon removal can help address emissions that are too challenging or cost-prohibitive to reduce with current technology on the path to net-zero. Importantly, after reaching net-zero, carbon removal can be used to eliminate historical emissions, getting global temperatures back to safer levels. The potential for carbon removal to contribute to a net-negative emissions world demands that it be used in addition to emissions reduction efforts.

Although Bill C-293 is the "pandemic prevention and preparedness", at least officially, we've already seen the climate change industry getting into bed it. Many will claim that there's a "mutual solution" in adopting environmental practices and preventing more outbreaks.

Teodora Durca, Former Parliamentary Intern, Now Lobbyist

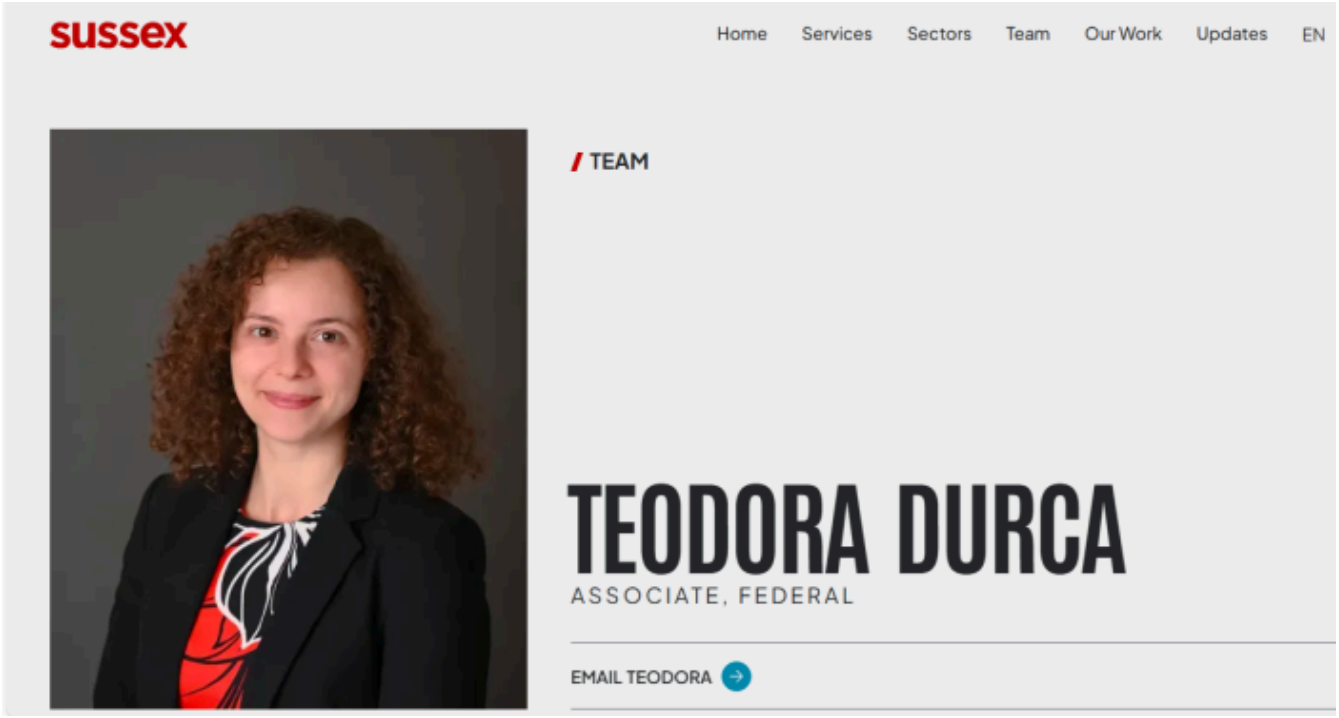
Teodora D. (She/Her)
Federal Government Relations Associate | Master of Public Policy
Parliamentary Intern, Office of M.P. Nathaniel Erskine-Smith
House of Commons of Canada Chambre des communes du Canada · Internship
Sep 2021 - Jul 2022 · 11 mos
Assist the M.P. on public policy research projects. Write communications material and email responses to campaigns.
Skills: Research Skills · Organization Skills



For nearly a year in 2021/2022, Teodora Durca was an intern in Erskine-Smith's office. Since then, she's moved on to Sussex Strategy Group, a lobbying firm with offices in Toronto and Ottawa.

According to the Federal Lobbying Registry, her recent clients include:

- Alectra Utilities Corporation
- Association of Power Producers of Ontario

- Atlantic Power
- BluEarth Renewables Inc.
- Canadian Power-to-X-Partners Inc.
- Capstone Infrastructure Corporation
- Electricity Distributors Association
- Energy Storage Canada
- Hydrostor Inc.
- Invenergy Renewables Canada Development ULC
- Kanin Energy Inc.
- Next Hydrogen Solutions
- Northland Power Inc.
- Potentia Renewables Inc.

A quick look through the profiles shows that these companies are interested in legislative changes around renewable energy. Several are asking about subsidies and tax changes.

A few sections of Bill C-293 read as follows:

> 2(l)(iii) ***promote commercial activities that can help reduce pandemic risk***, including the production of alternative proteins, and

> include the following information, to be provided by the Minister of the Environment:
> .
> 2(m)(i) after consultation with relevant provincial ministers, ***a summary of changes in land use in Canada, including in relation to disturbed habitats, that could contribute to pandemic risk, such as deforestation, encroachment on wildlife habitats and urbanization and that were made***, in the case of the first plan, since the last report on changes in land use published under the Federal Sustainable Development Act or, in the case of the updated plans, during the reporting period for the updated plan

Why this matters is that changes made as a result of this legislation could easily lead to (more) money being funneled into "green energy" schemes. Durca's clients stand to be made wealthy depending on what regulatory changes are made.

Erskine-Smith Met With ONE Global (Canada)

ONE
ONE Global (Canada)
About ONE Global (Canada)
ONE Global (Canada) works to educate people in Canada on issues related to ending extreme poverty and preventable disease, particularly in Africa.

June 2022, Erskine-Smith introduced Bill C-293. A month later, he formally met with Elise Legault of ONE Global (Canada). This is a group that probably few have heard of. Previously, Legault had worked for UNESCO.

The ONE Campaign is a 501(c)(3) registered non-profit in the United States. Their donor lists contains many prominent names.

- Aliko Dangote Foundation
- ***Bill and Melinda Gates Foundation***
- Bloomberg LP
- Bloomberg Philanthropies
- Iger Bay Foundation
- Bono

- Cargill
- Cary and Katya Pinkowski
- Cindy and Ryan Beedie
- David Geffen Foundation
- Eleanor Crook Foundation
- Elvia Arguelles Trust
- Ford Foundation
- Ann and John Doerr
- Ann and Joshua Bolten
- Hobson/Lucas Family Foundation
- Dr. Mo Ibrahim
- ***Open Society Foundations***
- ***The Rockefeller Foundation***
- The Ron Conway Family
- Sheryl Sandberg & Tom Bernthal
- Skoll Foundation
- Sherwood Foundation
- Tableau Foundation
- Coca-Cola
- Theresia Gouw and Matthew McIntyre
- Tom Freston

The ONE Campaign is financed, in part, by the Gates Foundation and the Rockefeller Foundation. This is important because of other parts of Bill C-293.

> 2(i) identify preparedness strategies for public health services across Canada including in respect of
>
> .
>
> (i) the protection of vulnerable and marginalized populations,
>
> (ii) working conditions of essential workers across all sectors,
>
> (iii) the ***availability and management of relevant stockpiles, including testing equipment and personal protective equipment***,
>
> (iv) the ***surge capacity of human resources required for the testing and contact tracing of persons exposed to infectious diseases***, and
>
> (v) communication of risk to the public;

Both Gates and Rockefeller are heavily involved in the pharmaceutical industry. It stands to reason that these organizations would support legislation that sees more taxpayer money diverted to finance production. This site has extensively covered the lobbying connections with GAVI, Zakery Blais, Ashton Arsenault and Cameron Doherty.

Calling Lauren Chen A "Traitor" For Taking Russian Money

November 5th, 2024, Erskine-Smith trolled Lauren Chen (a.k.a. "Roaming Millennial") for her being paid to push Russian propaganda. It's at 11:46 in the video. He asked what would you call someone who takes outside money to push foreign interests.

By his own logic, Erskine-Smith could be viewed as a traitor for promoting legislation that subverts Canadian interests, on behalf of outside ones.

But this is what happens when lobbying is so prevalent. It's never clear who actually writes what, and whose money made that happen.

In his online profile, Daniel Kelter claims that he "briefed [Erskine-Smith] on policy issues, including debates in front of the house, proposed legislation, and committee reports/issues".

This wouldn't be nearly as concerning without all the lobbyist connections. It's not a stretch to think that he's been involved in drafting legislation as well.

So then, who wrote Bill C-293?

Was it Daniel Kelter? Teodora Durca? Bill Gates? Or some other handler?

THANK YOU!!!!

I just assumed he was not seeking re election OR he was being graciously “financed”. These public officials have no business running a country. GTFO. Like, Sedition is a crime still!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

These humanoids make me sick – they are not my what I consider the same genome!!!

Ehren Rebmann

DECEMBER 2, 2024 AT 5:12 PM

Mr. Foreskin- Smith needs to take a lifelong sabbatical from any active involvement in government and lobbying. He is one of the most traitorous individuals ever to screw us Canadians around. He is seditious; I might add, just like Turdo and un-Freeland and the rest of the Lieberal gang.
